Saturday. January 14, 1871 Education in the Council-

Responsible Government can never come too soon. If any lover of Free Education had been present in the Council yesterday, he would have been fully convinced of that fact; and thoroughly persuaded that unless that form of Government shall obtain, no rational hope can be entertained that we shall have a school system adapted to the Colony. We had the Inspector General of Schools, Mr. Alston, expressing an opinion adverse to Free Schools. We had Mr. Trutch, who volunteered the Schools, and supplemented with the assertion that there was no such thing in the world—or among English-speaking the world—or among English-speaking the state of January 12th, A large ships boat, painted white with top streak grained on outside, and dark drab color inside, the name "Seaguil" painted on the stern. Any person giving information which may lead to the recovery will be liberally rewarded, by applying to remark that he did not believe in Free the Government should only help those who helped themselves virtually, that unless a community raised money to edu-cate its own children, it should receive no aid from Government. All who objected to the present apology for a School system were put down by the great Engineer as fault-finders. Such antiquated notions were, however, applauded by the junior member for this city, Dr. Helmcken. No Free Schools in this city now, he maintained, was the fault of its citizens, nor of the Government; and having the power to deprive the rising generation of the opportunity to acquire an education in a free school, in consequence of the failure of others to supply their share of the School Funds, under the School Ordinance, he insisted that he was right, that the Government was right in not offering any additional assistance to education, and in not bringing down to the House a new School Bill Even the payment of the arrears due teachers he repudiated of the arrears due teachers he repudiated as a matter purely connected with the Municipality,—making no allowance for accidents, nor any attempt to get the city schools, nor education gen-erally out of its difficulties. Now, whilst we concede to all others the same right that we claim and hold to express our opinions, and concede to them equal hossesty of purpose,—yet we have no hasitation in saying that the course that these brilliant political lights have been and are pursuing, tender it impossible to ever secure a good school system so long as they remain in power. In the present House they are all powerful now; and will be till a new and enlarged Council shall have been called. If, when that shall occur, the people of this city and this Colony think proper to return men opposed to free education, let them submit 16 the consequences. We have conmit 16 the consequences. We have conmit 16 the consequences. We have conmit 17 the consequences. We have conmit 18 the consequences. We have conmit 19 the consequences. We have conmit 20 the consequences. opposed to free education, let them submit to the consequences. We have confidence enough, however, in the wide-spread practical intelligence of British Columbians to say that when these events shall have occurred an overwhelming majority of the people will be found who will endorse and maintain not only free comman acheois throughout the length and breadth of the Colony, but to found and breadth of the Colony and the confidence of British For information apply to JER, NAGLE, Shipping Agent

### Education in Germany.

In Germany, every parish and every eivilcorporation is bound by law to provide sufficent schools for the elementary education of all children within its jurisdiction. The attendance of the children is secured by a system of compulsion which, ten years ago even, would have aroused within the minds of Engishmen the wealer that a nation could be induced to submit to it. Just as the compulsory the system of Pressis rather with interest than wonder. Just as the compulsory law of America may be traced to the strong religious feeling of the early Massachusaetts settlers, so the law of Germany takes us back to the times of the Reformation. Then it was considered the of the Church to see that every Protestant child should be taught the daties of the law of the content of t of religion—and primary secular instruction was indissolubly linked with religious teaching—now the Church has still the power when its remonstrances are despower when its remonstrances are despised. The present law of Germany simply legalizes and enforces traditional usage—the usage is not the creation of the law. The edict of Frederic William in 122, which is popularly regarded as the origin of the compulsory system which had already received the higher sanctions of religion and duty. Compulsory education has never in Germany had to straggle against an adverse public opinion, because the duty of the parent to educate his children has been admitted from the time of the birth of the reformed faith So, too, the rites of that faith have practically fixed the superior limit of the ages between a bich attendance at school is to, be secured. The ance at school is to be secured. The inferior limit may vary between five in Saxony, and highs in Hamburg; but by a national custom more potent than law, the school period ceases with confirmation and the first celebration of the Community,—St. Pauls.

All persons indebted to the said Bankrupt or that have any of his effects, are not to pay or deliver the same but to Mr. Richard Woods, at to Mr. Charles E. Pooley, the Official Assignees, whom the Hon. Mr. Justice Crease hash appointed, and give notice to Mr. Robert Bishop of Bastion Street, Victoria the Selicitor in the matter of this Petition.

Troche, which was sent from Parus by balloon, and afterwards forwarded by courier. In this epistle the General expresses his sympathy for the Holy Father in the misfortunes which have fallen upon him, and lamenta that the present condition of France prevents her from coming to his assistance, but he is persuaded that the disability will soon cease. As for himself, he had determined to seek retirement as soon as he accomplished his mission at Paris, but the dethronement of the tirement as soon as he accomplished his mission at Paris, but the dethronement of the Holy Father by the Italian annexation has led him to abandon this resolution; and he will make it his next duty to restore the Pope his triple crown. Letters and addresses of adherence pour into the Vatican from all sides, and keep the Holy Father in a state of exaltation which renders him indifferent to present reverses. present reverses.

Severament Street, next to St. hichola. CARD.

IN CONNECTION WITH MESSES. WALL and Gough, I came down from Nanaimo to solicit aid for the Distressed Families who have been compelled to appeare through us to the sympathies of the Public in the present crisis, brought about by what is called the Miners Strike, but which in reality is no such thing. This I could easily prove. At the present time, however I simply wish to state that my object in coming to Victoria was to endeavor to collect some means to alleviate the distress, which I know exists among the families of the miners of Nanaimo. My applications for this purpose have been responded to in the Spirit of Liberality, Characteristic of Victorians; But I regret to add that I have been challenged as ,"The head and front" of the Miners" Strike. I desire to disabuse the public mine of this idea by stating that I was absent in San Francisco when work in the coal mines was suspended, and have never attended any of the meetings upon the subject in dispute.

dispute.

My Mission here is simply to use my humble endeavor to raise sufficient funds to affordismporary relief to those who I know are suffering. For the truth of this statement my colleagues will vouch, they having been residents of Nanaimo for many year and are not in need jall lmd&w\*

N. B-Fire-proof Brick Building. au20 MAGIC SOAP

Directions for Using Robinson's Magic Soap for doing a Large Family Washing in Two Hours, of Five or Six Dozen Preces. Hours, of Five or Six Dozen Peeces.

1. Cut up fine a bar of the Soap, and put one-ha of it into your boller with sufficient water to cover your white clothes to be washed, and let the Soap dissove; then put your clothes in, stirring them, and let them just come to a boll; then pour out clothes and water into a tub and let them soak twenty or thi ty minutes, stirring them round in the tub occasionally to loosen the dirt. Such articles as collars, wristbands or any ar icle very dirty, should be rubbed through the hands a little while soaking in order to thoroughly loosen the dirt before bolling.

2. While your clothes are soaking put the other half of your cut Soap into your boiler, with sufficient clean water to boil, and let it be heating. After your clothes have soaked wring them out well and put into your boiling water, and let boil from 5 to 10 minutes; then rinse, blue and hang out to dry. If the above directions are followed, we will guarantee your clothes clean and white.

3. For your celoyed and woollen clothes were the state of the s

followed, we will guarantee your clothes use the same white.

3. For your colored and woollen clothes use the same water you sooked and boil your white clothes with, only heating it up again, and pour it over your colored and woollen clothes, and let soak the same as your white clothes, also rubbing them through your hands while soaking, if very dirty. Then rinse in clear water, warm a your hands will bear, and you will thus accomplish a large washing in two hours.

By cutting up a bar of this Soap into two gallons water, and let boil until thoroughly dissolved, and then le ve to cool, you will have two gallons of beautiful SOFT SOAP, as good as Common Soap for general house pur poses. 8. RGBINSON & R. J. MCDONELL.
